PROFESSIONAL SUMMARY

Frontend-focused Web Developer with hands-on industry experience building production-ready web applications using React.js, Next.js, and TypeScript. Experienced in developing reusable UI components, integrating REST APIs, and building responsive, scalable web applications. Familiar with Agile software development practices.

TECHNICAL SKILLS

Frontend: React.js • Next.js • TypeScript • JavaScript (ES6+) • HTML5 • CSS3 • Tailwind CSS • shaden/ui
Backend & DB: Node.js • Express.js • PostgreSQL • REST APIs
Tools: Git, Postman, Figma, Vercel, Github
Soft Skills: Communication, Problem-solving, Attention to detail, Team collaboration
Currently Learning: AI Integration for Web Applications, Search Engine Optimization (SEO)
Development Practices: Agile • SDLC • Component-Based Architecture • Responsive Design • API Integration
Core Competencies: Responsive Web Development • REST API Integration • Component-Based Architecture • Authentication • State Management

PROFESSIONAL EXPERIENCE

Web Application Developer
NAYATEL – Islamabad, Pakistan
Sep 2024 – May 2025

- Developed **6 production-ready frontend modules within 1.5 months** using React.js, Next.js, TypeScript, and Tailwind CSS.
- Built reusable, API-integrated UI components while collaborating with backend developers and UI/UX designers.
- Implemented industry training to deliver scalable frontend features for a live production application.
- Participated in debugging, testing, and code refinement to ensure application reliability and maintainability.

PROJECTS

TvaaS – Video Streaming Administration Platform (Industry Project)
Technologies: Next.js, TypeScript, Tailwind CSS, shaden/ui, RTK Query (Code-Confidential)

- Developed production-level frontend modules for a real-time video streaming administration platform.
- Built movie submission workflows, billing interfaces, advanced filtering systems, and reusable navigation components.
- Integrated REST APIs with RTK Query for efficient state management and real-time data updates.
- Designed reusable and responsive components to support scalable application architecture.

Netflix Clone (Full Stack Web Application)
Technologies: React.js, Node.js, Express.js, PostgreSQL, Tailwind CSS, OMDb API
[Live Demo](#) | [GitHub](#)

- Built a full-stack movie streaming application featuring secure user authentication and dynamic movie search.
- Integrated the OMDb API to fetch real-time movie information and display responsive search results.
- Developed RESTful backend services with PostgreSQL database integration and tested APIs using Postman.
- Deployed the React frontend on Vercel to demonstrate responsive design and API integration.

EDUCATION

BS Information Engineering Technology
Foundation University School of Science and Technology, Rawalpindi, Pakistan.
Oct 2021 – Jun 2025
