PROFESSIONAL SUMMARY

Information Engineering Technology graduate with hands-on experience in frontend and full-stack web development using modern JavaScript technologies. Skilled in building responsive user interfaces, integrating APIs, and developing scalable applications through academic and industry-based projects. Eager to contribute and grow as a Front-End Developer.

EDUCATION

BS Information Engineering Technology

Foundation University School of Science and Technology, Rawalpindi

Oct 2021 – Jun 2025

WORK EXPERIENCE

Web Application Developer

NAYATEL – Islamabad, Pakistan

Sep 2024 – May 2025

- Developed responsive and reusable UI components using React.js, Next.js, and Tailwind CSS
 - Collaborated with designers and backend developers to integrate RESTful APIs and deliver user-focused solutions
 - Ensured cross-browser compatibility and improved overall user experience
 - Participated in Agile development workflows while meeting project requirements and delivery timelines
-

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React.js, Next.js, Tailwind CSS, TypeScript

Backend & DB: Node.js, Express.js, PostgreSQL

Tools: Git, Postman, Figma, Vercel, Software Development Lifecycle (SDLC)

Currently Learning: Angular

Soft Skills: Communication, Problem-solving, Attention to detail, Team collaboration

PROJECTS

Automated OBE System (Final Year Project)

- Developed a full-stack Outcome-Based Education (OBE) system to automate academic evaluation, reporting, and data management processes

Netflix Clone (Full-Stack Web Application)

- Built a full-stack application using React.js, Node.js, Express.js, and PostgreSQL
- Integrated OMDb API for real-time movie data and designed responsive UI with Tailwind CSS
- Tested APIs using Postman and deployed the application on Vercel

TvaaS (Industry-Based Real-Time Project)

- Contributing to the development of multiple production-level frontend modules using Next.js and Typescript, including data submission workflow, advanced filtering, navigation and real-time VOD updates.
- Worked with reusable components, API-integrated forms, and state management (RTK Query) to support scalable and maintainable application architecture.
